Question	Answer	Explanation
1	**A**	The Korean peninsula at night.
2	**B**	The opportunity cost is the value of the next-best use of your study time.
3	**B, C, D**	Consider the social benefit, forgone alternative activity, and food cost. The already-paid subscription is a sunk cost.
4	**D**	All three examples involve unintended consequences.
5	**A, C**	Living standards changed relatively little before industrialization; sustained growth subsequently produced compounding increases in output.
6	**D**	D is the best answer
7	**C — $120**	The party is her next-best alternative. Opportunity cost does not add together all rejected alternatives.
8	**A, D**	College provides signaling and bundles education, credentials, networking, and other services. **This is inferred; the referenced lecture wasn't included.**
9	**C**	Paying per panel rewards panel quantity rather than electricity production or quality.
10	**D**	Unintended consequences: the environmental policy induces a potentially more damaging response.
11	**D**	Given that she is attending USC, the relevant alternative is her next-favorite major.
12	**B**	The intended answer is moral panic, particularly surrounding women's cycling and independence. Historical discussion
13	**A, C — intended answers**	Nike is the principal; Duplantis is the agent responding to its bonus structure. The interpretation requires an assumption about Nike's objective. However, B-E are covered in later lectures, so you would only be expected to know A after the Intro Lecture
